

THE WORLD LEADER IN FUME EXTRACTION TECHNOLOGY

Introducing BOFA's most technically advanced high volume extractor. The V Oracle packs a powerful range of unique features into one compact unit.

The revolutionary Auto-Voltage Sensing Pump automatically self adjusts to run on any voltage worldwide, whilst the Reverse Flow filter technology enhances filter performance and ensures longer filter life.

The Airflow Management System automatically adjusts the air capture rate as the number of arms in use changes. Automatic Flow Control ensures that the target airflow is maintained throughout the life of the filters.

The exceptionally large surface area of the DeepPleat DUO pre filter ensures high capture levels and extended filter life.

STANDARD FEATURES:

- Auto sensing voltage (90-257v) for global use
- Airflow Management System incorporating Automatic Flow Control
- DeepPleat DUO pre filter
- HEPA and Gas combined filter
- Reverse flow
- 'Easi-Seal' filter location
- Castors for portability
- Small footprint
- Low noise levels

The complete, global solution for high volume arm extraction for solder applications.
